GARDENIA AUGUST BEAUTY

We offer this information on the Gardenia, August Beauty. A number of years ago, a lady from the North purchased a moderately large plantation in the South. She was very fond of gardenias and had the gardens on the place rearranged to accomodate every variety of gardenia which was then available. After her death, the place was not occupied for a number of years. It was finally sold, and when the new owner was having the garden reworked a new variety of gardenia was found. It proved to be very hardy to cold. If the plant is dormant it can withstand temperatures well below the regular varieties of gardenias. The Gardenia August Beauty is very upright, compact, with long shining oleander-like foliage. It blooms when all the other varieties are finished blooming. It is loaded with flowers in August, hence its name. Blooms when very young. It is actually more an ever bloomer than any other variety we have found. Flowers are medium size, with extra long stems. Demand is so great that it is difficult to keep our customers supplied. Our prices for bushy, blooming size plants are \$2.50 each, and 3 for \$6.75, prepaid.

In conclusion we feel that you can readily see why we are so enthusiastic about this plant.
